of Evaporative Dry Eye & Meibomian Gland Dysfunction

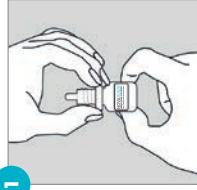

Ask for NovaTears® by name

For the Retailer: If you do not stock NovaTears, please contact your wholesaler to order. For more information contact AFT Pharmaceuticals on 1800 AFTPHARM. AFT Pharmaceuticals Pty Ltd, Sydney. ABN 29105636413

How to use NovaTears®

Due to the water-free formulation, NovaTears® shows a slightly different behaviour than traditional water-based eye drops.

To avoid wastage, please follow the below instructions*. As you may not feel the drop falling into your eye, we recommend application in front of a mirror.

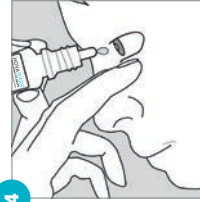

1 Unscrew the cap of the bottle. Before first use, separate the cap from the safety seal ring below the cap and remove it. Do not touch the dropper after removing the cap.

2

Hold the opened bottle upright and **gently squeeze** it between the thumb and index finger. Keep the bottle under slight pressure and turn upside down so the dropper faces downwards. Release the pressure to draw air into the bottle.

4

Lean your head back slightly and carefully pull down your lower eyelid.

Hold the opened bottle with the dropper pointing downwards above your eye. **Lightly squeeze** to release one drop into each eye.

5

Replace cap on eye drop bottle to close it.

***For more information please see product leaflet in pack.**
